

PIENAAR ENERGY (PTY) LTD

Sudan electric new energy storage equipment

Overview

EK SOLAR's 2023 hybrid project in North Darfur combines 5MW solar PV with 2.4MWh battery storage, providing 24/7 power to 12 villages. The system reduced diesel consumption by 85% - like replacing 50,000 liters of fuel monthly with clean energy. As the global push for cleaner, smarter energy solutions continues, solar-plus-storage systems are taking center stage. One of the latest installations, featuring two high-performance inverters and six M90 PRO lithium batteries, demonstrates how advanced technology can meet modern energy. Ever wondered what happens when a sun-drenched nation decides to turn its scorching rays into 24/7 power?

Enter Sudan's new energy storage industry project, where solar panels meet cutting-edge batteries to rewrite the country's energy script. With 59% electrification rates and heavy fossil fuel, Sudan aims to generate 60% of its electricity from renewables by 2030, requiring 800 MW of energy storage capacity according to national energy plans. While lithium-ion batteries dominate global markets, Sudan's climate conditions (average 40°C) demand adapted solutions: EK SOLAR's 2023 hybrid. WASHINGTON, J— The World Bank Board of Executive Directors recently approved the Accelerating Sustainable and Clean Energy and Digital Access Transformation project for Sudan (ASCENT-Sudan) which aims to expand energy access and digital services in Gadaref, Kassala, Northern and River. Energy Poverty Drives Socioeconomic Inequality: Deprivation from energy has far-reaching economic, social, and gender impacts, limiting access to services and opportunities. This article explores the market landscape, key companies like EK SOLAR, and actionable insights for businesses eyeing opportunities in this sector.
