Syria s energy storage container exports

ESS

Overview

A drone view shows oil storage tanks, as Syria begins to transport oil for the first time since the fall of Bashar al-Assad's regime, in the port of Tartus, Syria, Septem. (Reuters) Syria exported 600,000 barrels of heavy crude oil on Monday from the port of Tartus as part of a deal with. This month, Syria loaded its first crude oil export cargo since the Assad regime's fall—in fact, its first in more than a decade. Although this was a significant outcome of loosened U. and EU sanctions, the cash-strapped country still needs high volumes of oil imports as it attempts to. Syria has officially re-entered the global oil market with the export of its first crude shipment in 14 years, marking a significant milestone in the country's efforts to revive its shattered economy. The EU can be part of the solution with a strong offer supporting domestic electricity generation and long-term energy system integration. Syria's energy system is in ruins.
