Temperature controlled solar energy storage cabinet

Overview

This product integrates city power, oil engine, photovoltaic inverter system, wind power control system, photovoltaic panel telescopic control system, backup lithium battery energy storage system, intelligent temperature control system, power environment monitoring system. This product integrates city power, oil engine, photovoltaic inverter system, wind power control system, photovoltaic panel telescopic control system, backup lithium battery energy storage system, intelligent temperature control system, power environment monitoring system. EK photovoltaic micro-station energy cabinet is a highly integrated outdoor energy storage device. Its core function is to convert renewable energy such as solar energy and wind energy into stable electricity, and realize energy storage, distribution and monitoring through intelligent energy. AZE's all-in-one IP55 outdoor battery cabinet system with DC48V/1500W air conditioner is a compact and flexible ESS based on the characteristics of small C&I loads. The commercial and industrial (C & I) system integrates core parts such as the battery units, PCS, fire extinguishing system. Built-in fire, flood, and temperature control with system warnings for safety. Dual fire suppression, ATS/STS ensure seamless power switching. Integrated BMS/PCS/EMS supports diverse applications. The compact design of the cabinet allows for easy installation and space optimization. With a capacity to store solar power. Shandong Harbor Electric Power Engineering Co.
