

**PIENAAR ENERGY (PTY) LTD**

# **The best solar power plant in China**

## Overview

---

The following list details the monumental utility-scale photovoltaic projects that are cementing China's position as the undisputed global leader. These installations, many of which came online or were announced in 2024, showcase a scale and ambition that is accelerating the energy. Solar PV capacity accounted for 16. This is expected to contribute 33. 7% by the end of 2030 with capacity of installations aggregating up to 4,822GW. Of the total global. The plant has a total capacity of 6. China has just connected what it believes to be the world's biggest solar power plant to the grid in northwestern Xinjiang. 530144 MW of amorphous silicon thin-film modules.
