

PIENAAR ENERGY (PTY) LTD

The current market price trend of photovoltaic panels

Overview

The inflation-adjusted cost benchmark rose in 2023 for utility-scale PV systems but fell for residential PV systems owing to recent trends in network upgrade costs, Inflation Reduction Act manufacturing tax incentives, and other cost drivers. Average price of solar modules, expressed in US dollars per watt, adjusted for inflation. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) – Learn more about this data Note: Costs are expressed in constant 2024 US\$ per watt. Relevant sources would include industry reports, market research, and reputable energy. The International Renewable Energy Agency (IRENA) reports that, between 2010 and 2023, the global weighted average levelized cost of energy of concentrating solar power (CSP) fell from \$0.39/kilowatt-hours (kWh) to under \$0. Understanding Photovoltaic Panel Price Trends The photovoltaic panel price trend chart reveals a fascinating story of technological advancement and market dynamics. In August, high-efficiency modules dropped to €0.12 per watt, marking an all-time low for the sector. According to the monthly index.
