

**PIENAAR ENERGY (PTY) LTD**

# **The current status of solar energy storage technology in China**

## Overview

---

Data from the China Electricity Council shows that in 2022, new energy storage systems delivered just 6.1% of their potential maximum output. China's National Energy Administration (NEA) has released the China New Energy Storage Development Report 2025, marking the first official and comprehensive government report dedicated to the country's rapidly advancing new energy storage (NES) sector. The report, jointly prepared by the NEA's. In China, generation-side and grid-side energy storage dominate, making up 97% of newly deployed energy storage capacity in 2023. 2023 was a breakthrough year for. It is currently the largest single electrochemical storage facility in the country (Image: Ma Mingyan / China News Service / Alamy) In February 2025, China shelved a requirement that new domestic wind and solar projects be bundled with energy storage.
