

PIENAAR ENERGY (PTY) LTD

The future market of solar power generation

Overview

The Solar Power market in the U. is projected to grow significantly, reaching an estimated value of USD 103.96 billion by 2032, driven by the need to combat climate change through renewable energy sources reinforced by government tax credit and feed-in-tariff programs. The year 2024 was a true landmark year for solar power. Global solar installations reached nearly 600 GW - an impressive 33% increase over the previous year - setting yet another record. Even so, Goldman Sachs Research expects rapid growth in the sector, with global solar installations set to rise to 914 Gigawatts (Gw) in 2030, 57% above 2024 levels. Compared to other sources of. The future of solar energy is set for exceptional growth as advancements in technology, increased investments, and strong policy support continue to push the industry forward.
