

PIENAAR ENERGY (PTY) LTD

The largest power station generates electricity

Overview

As of 2025, the largest power generating facility ever built is the Three Gorges Dam in China, completed in 2012. Non-renewable power stations are those that run on coal, fuel oils, nuclear fuel, natural gas, oil shale and peat, while renewable power stations run on. There are multiple types of power stations, including both renewable power sources and non-renewable power sources. 5 gigawatts (GW)?

The Three Gorges Dam is a hydroelectric gravity dam that spans the Yangtze River by the town of Sandouping, in Yiling District, Yichang, Hubei province, in central China.
