

**PIENAAR ENERGY (PTY) LTD**

# **The latest cost standards for photovoltaic energy storage stations**

## Overview

---

As of 2025, prices range from \$0.86 per watt-hour (Wh) for utility-scale projects, while residential systems hover around \$1,000–\$1,500 per kWh [4] [6] [9]. But wait—why the wild variation?

Let's dive deeper. NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. This work has grown to include cost models for solar-plus-storage systems. NLR's PV cost benchmarking work uses a bottom-up. Each year, the U. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U. These benchmarks help measure progress toward goals for reducing solar electricity costs. The battery storage technologies do not calculate levelized cost of energy (LCOE) or levelized cost of storage (LCOS) and so do not use financial assumptions.

### U.S. Solar Photovoltaic System and Energy Storage Cost

This year, we introduce a new PV and storage cost modeling approach. The PV System Cost Model (PVSCM) was developed by SETO and NREL to make the cost benchmarks simpler and more
