

## PIENAAR ENERGY (PTY) LTD

# The photovoltaic panel keeps charging the battery

## Overview

---

A solar panel can overcharge a battery if connected directly without safeguards. Overcharging risks include overheating, swelling, leaks, and reduced lifespan. This guide breaks it down simply so you can power up without. Solar power generators use batteries to store the electricity they generate for later use. While solar batteries offer excellent performance, there are key considerations that can help consumers maximize their investment. When harnessing the power of solar energy, it is crucial to ensure the efficient and safe charging of your batteries.
