

## **PIENAAR ENERGY (PTY) LTD**

# **The roof of the pigpen can be equipped with solar panels**

## Overview

---

Would solar panels on pig farms be something for you to consider?

The available roof area is usually more than sufficient for a solar installation to supply your entire annual energy needs. Most pig stall roofs are ideal for installing solar panels. It's built with advanced. Structural Assessment is Critical: While most barns can support solar panels, proper structural evaluation is essential since solar panels add 2-4 pounds per square foot and have 25-30 year lifespans. Expanding energy independence is another key advantage. It allows farmers to power equipment remotely or during outages, improving operational continuity. Before we start the installation, we thoroughly.

### Home Energy Storage (Stackable system)

- Product Introduction**
- ☑ Scalable from 10 kWh to 50 kWh
  - ☑ Self-Consumption Optimization
  - ☑ Integrated with inverter to avoid the compatibility problem
  - ☑ LFP battery, safest and long cycle life
  - ☑ Stackable design, effortless installation
  - ☑ Capable of High-Powered Emergency Backup and Off-Grid Function
