

**PIENAAR ENERGY (PTY) LTD**

**The scale of Haiji New Energy  
Storage is small**

## Overview

---

With 314Ah energy storage cells, the loading capacity of a 20-foot container has increased from the original 3.44MWh to 5MWh, and the system integration cost has been reduced by more than 10%, achieving a larger capacity and bringing customers a more efficient energy solution. Haiji New Energy Storage represents significant advancements in energy efficiency, leading to reduced reliance on fossil fuels, which is crucial for combating climate change. The company utilizes innovative technologies that enhance energy conversion and storage capabilities. 82 GWh of energy-storage cells in the first quarter this year. Recently, the first batch of Haiji New Energy's 314Ah energy storage cells were officially put into mass production, marking the beginning of the era of Haiji's large-capacity batteries. Traditional lithium-ion batteries, while useful for smaller devices, sort of fall apart when scaled for industrial use. Consider these pain points: \*Preliminary data from May 2024 field tests Wait, no—actually, it's more like five. ENERGY STORAGE INDUSTRY HAIJI NEW ENERONIZATION while maintaining reliability.
