The school uses a 150-foot smart photovoltaic energy storage container from North Africa

Overview

The QIANEN 150KW Commercial Mobile Solar Generator offers a revolutionary solution for portable clean energy needs. Housed in a rugged container design, this powerful solar storage Solar Container for Construction answers this with facade-integrated photovoltaic panels and smart grids. SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects. How much energy does a school use?

During school operating hours, the energy consumption was 22 MWh and 20 MWh for stable and intermittent. That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar energy while at the same time being compact in design, easy to transport and quick to set up. Unlike standard solar panel containers, LZY's mobile unit features a retractable solar panel unit for quick installation.
