Common Solar Light Problems and How to Fix Them

During the day, the panel absorbs sunlight and turns it into power, which gets stored in the battery. At night, the sensor tells the LED to turn on using that stored energy. If anything in this ...

How To Get Your Solar Lights Working Again

Shade Your Light Sensor
 Check Your Batteries
 Avoid Shadows
 Position Your Solar Panels at The Best Angle
 Face Your Panels Towards The South
 Check For Water Damage
 Restart Your Solar Light
 Clean Your Solar Panel
 Don'T Charge Your Solar Light Through Glass
 Reset Or Replace Your Lux Sensor
 The Lux Sensor is a vital part of your solar light, and it controls when your light switches on. By

changing its settings, you can make your solar light turn on once it detects light levels dropping below a certain threshold. Sometimes, an overly-sensitive Lux sensor might be turning your solar light off, even when it becomes dark. This can be fixed. See more on [todayshomeowner](#)
