

PIENAAR ENERGY (PTY) LTD

UPS battery cabinet material

Overview

The battery cabinet is made of cold rolled steel or galvanization plates of high mechanical performance and bearing capacity. Unique NiZn benefits include: ZincFive batteries were tested at the cell level to UL9540A, a Test Method. Lightweight aluminum is perfect for battery trays, covers, and cable management ducts, which improve handling, speed up installation, and naturally resist corrosion. By combining steel uprights with aluminum trays, you get a rack that is both durable and ergonomic—a true "best of both worlds". MPINarada integrated battery cabinet solution offers a turn-key battery and battery cabinet option for UPS battery backup. Cabinet solutions are available in both size and color to match most UPS system manufacturers. Cabinet solutions can be equipped with an optional circuit breaker for either. An UPS battery rack cabinet is a specialized enclosure designed to securely house batteries for an uninterruptible power supply (UPS) system.
