

PIENAAR ENERGY (PTY) LTD

Ukrainian energy storage power supply

Overview

The Ukrainian government abolished VAT and import duties on both solar modules and battery storage equipment, initially in July 2024 and since extended through 2028. The 200 MW/400 MWh installation spans six sites ranging from 20 MW to 50 MW and connected to the power grid in the Kyiv and Dnipropetrovsk regions. Industry estimates indicate that Ukraine installed about 1. This brought the country's cumulative solar capacity to well over 8.5 GW by year-end, demonstrating robust growth despite ongoing challenges. The. Overall, the goal is to achieve an energy collapse in Ukraine, especially during periods of the lowest temperatures — that is, a scenario of cold extermination. In the 1930s of the last century, Ukraine was subjected to the Holodomor; now Russia wants to impose a “Kholodomor” (Genocide through cold. Renewable energy sources (RES) continue to supply 8.7% of Ukraine's energy, down from 9.
