

**PIENAAR ENERGY (PTY) LTD**

# **Venezuela s proportion of new energy and energy storage**

## Overview

---

Over the past 28 years, the average share of renewable energy consumption in Venezuela, expressed as a percentage of total final energy consumption, has been approximately 15%. The highest value recorded during this period was 16. These factors led to a lack of investment and maintenance in the energy sector and a deteriorating infrastructure. Renewables are mainly used to generate electricity, though renewable technologies can also be used for heating in homes and buildings. Renewable. Loading data error. Source: ECLAC, calculated on the basis of OLADE, Energy Economic Information System (SIEE) [online] Primary supply obtained from OLADE and GDP at Constant Prices in 2010 dollars obtained from CEPALSTAT . The Guri Dam, located in the Bolívar state, is one of the largest in Latin America and provides a significant amount of electrical energy to the country. 5%) between 2016 and 2021, reflecting both the country's economic contraction and its loss of productive capacity.
