

**PIENAAR ENERGY (PTY) LTD**

# **Vietnam s catering industry uses 30kWh off-grid solar energy storage cabinets**

## Overview

---

Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating energy storage systems. Vietnam's solar policy update highlights growing role of energy storage. However, the intermittent nature of solar energy creates challenges for grid stability. That's where solar energy storage products come into play—they. With rising electricity costs, grid unreliability in rural zones, and increasing rooftop solar adoption, both homeowners and businesses are turning to solar battery storage to ensure 24/7 energy independence, cost savings, and long-term sustainability. Held at the Eastin Grand. High cost: \$450/kW + \$225/kWh (equivalent to \$900/kW for a 2-hour battery, \$1,350/kW for a 4-hour battery). With abundant solar potential due to its geographical location, the country has become a significant player in the Southeast Asian.
