

PIENAAR ENERGY (PTY) LTD

**We use solar energy to
generate electricityEnglish**

Overview

Solar technologies convert sunlight into electrical energy either through photovoltaic (PV) panels or through mirrors that concentrate solar radiation. Below, you can find resources and information on the. Over time, people developed technologies to collect solar energy for heat and to convert it into electricity. Radiant energy from the sun has powered life on earth for many millions of years. Solar energy is any type of energy generated by the sun.

We use solar energy to generate electricityEnglish

Solar explained

Energy from the sun The sun has produced energy for billions of years and is the ultimate source for all of the energy sources and fuels that we use. People have used the sun's rays (solar radiation) for ...

How does solar power work?

Solar power works by converting energy from the sun into power. There are two

forms of energy generated from the sun for our use - electricity and heat. Both are generated through the use of solar ...
