# **What are the adapters for photovoltaic panels**

## Overview

---

A solar panel connector is a device used to establish a secure and reliable electrical connection between solar panels. They also link solar panels and other components of a photovoltaic (PV) system, such as inverters, charge controllers, and batteries. Upgrade your solar power setup with versatile adapters and cables. Connectors are an integral part of any renewable energy system, ensuring that all parts fit together and can transfer energy safely from the panels to other electrical components.
