What is a communication maritime base station

Overview

Maritime Base or Coast Station is defined as a fixed station that operates on land in the maritime service. The maritime service helps ensure safe navigation by ships (and other vessels) through radio operations such as ship-to-ship and ship-to-shore messaging. " [1] Each station is. Ku-band VSAT (12-18 GHz) has been the maritime workhorse, Ka-band HTS (26-40 GHz) offers higher capacity, while C-band deployments are restricted near shore due to interference and large dish requirements. VHF, cell phones, Family Radio Service radios, CB radios, Single Sidebands, and satellite communications are among the myriad of choices available. Fleet Xpress continues to offer dependable, managed connectivity services backed by Inmarsat's expertise.
