# **What is a photovoltaic four-hole bracket**

## Overview

---

They are used to secure solar panels onto rooftops, ground mounts, or other structures. Solar Photovoltaic (PV) system as a source of renewable electricity. Solar electric power can be made available continuously for consistent on-off grid applications. It is environmentally friendly as well. They provide a stable base for the solar cells like roofs, building facades, or. Photovoltaic mounting systems (also called solar module racking) are used to fix solar panels on surfaces like roofs, building facades, or the ground. You'll appreciate its quick installation process, height adjustability, and compatibility with flat or pitched roofs.

Photovoltaic mounting systems (also called solar module racking) are used to fix solar panels on surfaces like roofs, building facades, or the ground. These mounting systems generally enable retrofitting of solar panels on roofs or as part of the structure of the building (called BIPV). As the relative costs of solar photovoltaic (PV) modules has dropped, the costs of the racks have become more important and for small PV systems...
