What is the patent for photovoltaic bracket water tank

Overview

The invention patent of an integrated water tank bracket (application number 201910115863. 1) of an integrated water tank bracket of a photovoltaic panel, which are applied by Anhui Yu. The invention discloses a novel water tank support for installing a photovoltaic panel and a drag hook matched with the water tank support for installing the photovoltaic panel, belonging to the technical field of photovoltaic panel installing supports, wherein the water tank support comprises: the. The present invention relates to a solar panel bracket, and in particular to a solar panel bracket with a water conducting function. Solar energy refers to energy from light and heat radiated from the sun which are utilized by a series of technologies that are constantly developing. Among them, the. fluid) returns to the collector to pick up more heat. The technical point description of the patent document. The roof Workers install residential rooftop solar panels. The. [0010] exist figure 1 Among them, the inner water tank 1 of the photovoltaic solar water tank is wrapped in the polyurethane insulation layer 2, and the polyurethane insulation layer 2 is wrapped in the water tank shell 3. Details of concept development, structural and hydroelastic performances of the proposed system were presented. Experimental tests on floating modules were conducted and uncertainty analysis of submersion of photovoltaic cables in water. U.

What is the patent for photovoltaic bracket water tank

The pressing thickness photovoltaic bracket water tank

PV system should meet a power generating capacity of 100 kWp. High density polyethylene (HDPE) material is chosen for the design of the floating modules in view of its material strength and durability
