# What is the price of photovoltaic panels for street lights

## Overview

---

The price of solar street lights varies significantly based on their specifications, quality, and origin. Entry-level (20-40W LED): Often suitable. The average cost of one light, including the lighting fixture, pole, and base, averages at \$2000. Not bad for the cost of one street light. Solar street lights utilize fixtures connected to a (typically) silicon-based solar panel to garner electricity through a process called the photovoltaic. What makes solar street light prices so much different?

Solar street lights usually consist of solar panels, solar controllers, batteries, LED street lights, brackets, etc.
