

## PIENAAR ENERGY (PTY) LTD

# When will solar power generation start

## Overview

---

Almost 70 gigawatts (GW) of new solar generating capacity projects are scheduled to come online in 2026 and 2027, which represents a 49% increase in U.S. electricity generation will grow by 1.6% in 2027, when it reaches an annual total of 4,423 BkWh. The three main dispatchable sources of electricity generation (natural gas, coal, and nuclear) accounted for 75% of. Solar, wind, and batteries are set to supply virtually all net new US generating capacity in 2026, according to EIA data reviewed by the SUN DAY Campaign, continuing their strong 2025 growth. EIA's latest monthly "Electric Power Monthly" report (with data through Novem), once again. Here is what it will take for us to power the planet on sunshine Is solar power going to take over the world?

The past few years have seen a frankly astounding acceleration in the rate of its deployment, with total generation capacity doubling between 2022 and 2024 to supply a full 7 per cent of. Despite elevated geopolitical tensions and economic uncertainty, this tenth edition of the IEA's World Energy Investment shows that capital flows to the energy sector are set to rise in 2025 to USD 3. Data source: Ember (2026); Energy Institute - Statistical Review of World Energy (2025) - Learn more about this data Measured in terawatt-hours. 2 TW and pushing non-fossil power sources past thermal generation for the first time. China's National Energy Administration (NEA) released its 2025 power sector statistics on Jan.

## When will solar power generation start

---

### Solar power generation, 2025

Electricity generation from solar, measured in terawatt-hours.
