

PIENAAR ENERGY (PTY) LTD

Where to use solar energy to generate electricity

Overview

Solar energy is commonly used for solar water heaters and house heating. The heat from solar ponds enables the production of chemicals, food, textiles, warm greenhouses, swimming pools, and livestock buildings. Over time, people developed technologies to collect solar energy for heat and to convert it into electricity. Professor of Engineering, Pennsylvania State University. Both are generated through the use of solar panels, which range those found on rooftops of our homes and businesses to 'solar farms' stretching. Solar energy is a form of renewable energy, in which sunlight is turned into electricity, heat, or other forms of energy we can use.

Where to use solar energy to generate electricity

Solar energy

Solar power, also known as solar electricity, is the conversion of energy from sunlight into electricity, either directly using photovoltaics (PV) or indirectly using concentrated solar power.

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled

ENERGY STORAGE SYSTEM

How Does Solar Work?

This energy can be used to generate electricity or be stored in batteries or thermal storage. Below, you can find resources and information on the basics of solar radiation, photovoltaic and concentrating ...

How is electricity generated using solar?

Solar panels generate a direct current of electricity. This is then passed through an inverter to convert it into an alternating current, which is funnelled into the grid, or used by homes and businesses which ...
