Overview

In this article, we cover nine of the best solar stocks to buy in 2025, all listed on major U.S. exchanges. We aim to give you a clear, beginner-friendly view of each company, why it qualifies, and what the risks are. If you're a believer in the future of solar power and can look past the recent volatility from rising energy prices, Forbes Advisor would like to share with you what we believe are among the best solar power stocks to consider right now. Companies in the industry are working to transition the global economy from fossil fuels such as oil and natural gas to renewable energy sources. Despite the elimination of many federal tax incentives, solar remains the nation's dominant form of new electricity-generating capacity added to the U.S. Per a report by the Solar Energy Industries Association ("SEIA"), published in early September 2025, solar photovoltaic ("PV") accounted for 56% of the new electricity-generating capacity added to the U.S. Hence, it remains the nation's dominant form of new.
