

PIENAAR ENERGY (PTY) LTD

Who invented the nickel iron battery

Overview

Nickel-iron batteries were invented by Thomas Edison in 1901, and were used in early electric vehicles. In 2023 Battolyser has installed the first industrial-scale Battolyser system at the RWE Magnum power gasplant in Delfzijl. Read on and discover nickel-iron battery history you may not know. Ernst Waldemar Jungner was born in 1869 in Västra, Götaland County, Sweden. He was a sickly lad who loved to concentrate on his books and studies. But he also had an inventive. The Nickel Iron battery or NiFe battery, nickel (III) oxide-hydroxide positive plates and iron negative plates, with an electrolyte of potassium hydroxide. A very low gravimetric energy density of 19 to 25Wh/kg.

Who invented the nickel iron battery

The battery invented 120 years before its time

Building on the work of the Swedish inventor Ernst Waldemar Jungner, who first patented a nickel-iron battery in 1899, Edison sought to refine the battery for use in automobiles.

BU-101: When Was the Battery

Invented?

Low specific energy, poor performance at low temperature and high self-discharge limited the success of the nickel-iron battery. It was not until 1932 that Schlecht and Ackermann ...
