Why do solar power stations need to raise sheep

Overview

Livestock are a very effective vegetative management tool for community and utility solar energy systems. Croix breed is a good match for solar fields because it is a hair sheep that sheds and doesn't need to be sheared, meshing well with a hands-off approach. Photo: Courtesy of Eric Steeves Eric Steeves says raising sheep on forages grown under thousands of acres of solar panels provided economic stability and perhaps even saved his family's. Western professor Joshua Pearce collaborated with professional shepherd Rafael Lara on a study that shows the profitability of "solar" sheep, raised specifically to trim grass and weeds under traditional solar panels or agrivoltaic arrays. Lara, who studied animal science at Universidade de São. It's a simple but brilliant idea: instead of using loud mowers or chemicals to manage vegetation under solar panels, why not let sheep do the job naturally?

This is not just cute but practical, eco-friendly and surprisingly effective. The booming solar industry has found an unlikely mascot in sheep as.

Why do solar power stations need to raise sheep

Sheep & Solar: A "Beautiful Symbiotic Relationship"

Sheep and solar are good partners, as the ruminants consume grassy plants so sunlight can reach the panels and the array stays productive.

- 
Efficient Higher Revenue
 - Max. Efficiency 97.5%
 - Max. PV Input Voltage 600V
 - 150% Peak Output Power
 - 2 MPPT Trackers, 150% DC Input Overvoltage
 - Max. PV Input Current 16A, Compatible with High Power Modules
- 
Intelligent Simple O&M
 - IP66 Protection Degree: support outdoor installation
 - Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
 - DC & AC Type II SPDs prevent lightning damage
 - Battery Reverse Connection Protection
- 
Flexible Abundant Configuration
 - Plug & Play, EPC Switching Under 10min
 - Compatible with Lead-Acid and Lithium Batteries
 - Max. 6 Units Inverters Parallel
 - AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation

Feed-in tariff or sheep farming subsidy? Implications of promoting

Utility-scale solar panels may be shielded by overgrown grass, which may cause problems of low efficiency and fire. In recent years, a possible way to solve the above problems could be ...
