

PIENAAR ENERGY (PTY) LTD

Wind and solar power generation leaders

Overview

A quick summary of the global renewable race in this one sentence using new renewable electricity generation capacity as the metric: China leads at 64%, the US comes in second with 11%, and the rest of the world combined accounts for the remaining 25%. Here in Australia, we are building out renewable power and storage at record rates, and they now make up more than 40% of our electricity in our main grid – and 36% across the country. We are far from alone in the global renewable rollout: in the first half of 2025, for the first time ever, the. Clean energy technologies like wind and solar power are on track to supply nearly half the world's electricity by 2030. But some of the world's biggest economies — including the U. — are lagging behind, missing out on an opportunity for clean jobs and healthier air. Note that in this report, with information up to. 1985 2024 1990 1995 2000 2005 2010 2015 0 TWh 5,000 TWh 10,000 TWh 15,000 TWh 20,000 TWh 25,000 TWh 30,000 TWh Data source: Ember (2026); Energy Institute - Statistical Review of World Energy (2025) - Learn more about this data Note: "Other renewables" include geothermal, wave, and tidal.
