# **Wind power generation hours in Siziwang Banner**

## Overview

---

After the project is fully put into operation, it can generate 18 billion kilowatt hours of clean electricity annually, reducing carbon dioxide emissions by 15. (CCTV News). Global Wind Power Tracker, a Global Energy Monitor project. Inner Mongolia Siziwang Banner Wind Heating Project is an operating wind farm in Wulanhua Zhen, Dorbod (Siziwang) Banner, Ulanqab, Inner Mongolia, China. The map below shows the approximate location of the wind farm: Loading map. These installations are projected to produce 90,000 tonnes of green hydrogen annually, which will. The first batch of units of the largest onshore wind power project in the world have been connected to the grid for power generation, with an annual electricity output of up to 36 billion kilowatt hours.
