

PIENAAR ENERGY (PTY) LTD

Wind power project wind turbine

Overview

The top wind energy projects supporting the energy transition include companies like China Longyuan Power, SSE Renewables, Equinor, Ørsted and Enercon. Ambitious government policies, technical advancements and increasing investor confidence are pushing wind energy to new heights. The top wind energy projects supporting the energy transition include companies like China Longyuan Power, SSE Renewables, Equinor, Ørsted and Enercon. Ambitious government policies, technical advancements and increasing investor confidence are pushing wind energy to new heights. Wind power has been the largest source of renewable energy in the U.S. since 2019, with more than 153 GW installed. Although the country's capacity more than doubled from 2014 to 2023, most of the wind energy produced is onshore, with the offshore wind farms slowly rising. Despite this progress, Cordelio Power's 135-MW Crossover Wind project in Cross County, Arkansas, has achieved commercial operations. LPO financed Shepherds Flat, one of the largest onshore wind farms at the time, in 2010 and moving forward can support the expansion of infrastructure needed to catalyze an offshore wind industry.
