

**PIENAAR ENERGY (PTY) LTD**

# **Wind turbine blade model making**

## Overview

---

This tutorial demonstrates the 3D design of a wind turbine rotor blade in SolidWorks, including load simulation, results, and assembly process for passive control. The model estimates the bill of materials, the number of labor hours and the cycle time, and the costs related to direct labor, overhead, buildings, tooling, equipment. Build the prototype of a wind turbine blade with fiber glass, cardboard, software, tools and affordable or free materials. The 5 blade sections slot together with a lock and key mechanism. You can order a kit from the STELR website (link below) if you don't already have one.

### Design, Print and Test a Mini Wind Turbine Blade! (CAD

This is a tutorial for students to learn how to design their own wind turbine blade in Tinkercad, which you can 3D print or laser cut and use with the STELR wind energy kit.

## A Detailed Wind Turbine Blade

## Cost Model

This work aims to define a detailed parametric blade cost model for modern multimewatt wind turbine blades via vacuum-assisted resin transfer molding (VARTM).
