Zambia Power Base Station Announcement

12.8V 200Ah

Overview

This grid-connected facility will supply electricity to First Quantum Minerals, freeing up local power capacity for households and businesses. It marks a major stride toward reducing dependency on hydropower and imported electricity. The announcement came during a ceremony at the Kafue Gorge Lower Hydro. Plans to increase the power generation capacity at Chishimba Hydro Power Station in Kasama district in Northern Province have progressed.

8. El Nino drought which has had a significant impact on the energy sector among others. The country heavily relies on hydroelectric power which accounts for about 85% of installed generation capacity, and the drought has greatly reduced w load management was necessitated to avoid a complete shutdown. President Hakainde Hichilema has unveiled an ambitious plan to nearly triple Zambia's electricity generation capacity to 10,000 megawatts, positioning the country as a key player in Africa's regional power market.
