

PIENAAR ENERGY (PTY) LTD

Zambia lithium iron phosphate solar container battery

Overview

Zambia's factory produces lithium iron phosphate (LiFePO₄) storage modules specifically designed for African conditions – dust-proof, heat-resistant, and capable of handling voltage fluctuations that'd fry regular batteries. Since 2022, Bairen Energy Storage has deployed 47 battery energy storage systems (BESS) across West Africa. Their Ouagadougou flagship project—a 20MW/80MWh lithium-ion facility—powers 15,000 homes after dark using solar energy captured during daylight. [pdf] This report is available at no cost from. Lithium Iron Phosphate (LiFePO₄) batteries with a BMS control systems are high-performance alternatives to the conventional Lead Acid VRLA type with principal applications for solar power system storage and mains power supply backup. They offer considerable benefits including enhanced power output. The newly inaugurated Choma Solar plant, combining 60 MW of solar capacity with 20 MWh of battery storage, marks a turning point for energy access and reliability in rural areas. The built in Battery Management System (BMS) boast the most advance BMS installed in a battery.

Zambia lithium iron phosphate solar container battery

Zambia lithium iron phosphate energy storage battery factory

Factory supply, wholesale & custom 12.8V 200Ah lithium iron phosphate battery with BMS 200A, cycle life ≥ 2000 , suitable for solar energy storage, RV, marine, UPS, communication base
